

Avery Dennison Performance Tapes

Pressure-sensitive Adhesives for Weather Sealing

Double coated rubber based adhesive scrim tapes with excellent weather and plasticizer resistance.

Excellent for application on EPDM foams that are applied on profiles of windows and doors to form weather seals or strips used for sealing gaps around window and doors.

Also possible for application on V-type seals.

A versatile adhesive tape for multiple applications based on EPDM foams.

Easy: Peel and stick application, preventing foam stretching. Convenient to laminate to EPDM.

Fast: Requires no cure time, reduces installation time and allows immediate usage.

Sustainable: Developed for long aging performance. Resistant to outdoor / weather and plasticizer migration.

Product Range Details

Construction	FT 666	FT 660	FT 7984	FT 7970
Liner	Havana glassine	Blue glassine	Havana glassine	Blue glassine
Adhesive 1	Synthetic hotmelt rubber	Synthetic hotmelt rubber	Synthetic hotmelt rubber	Synthetic hotmelt rubber
Carrier	Polyester scrim	Glass fibre scrim with polyester film	Glass fibre scrim	Glass fibre scrim with polyester film
Adhesive 2	Synthetic hotmelt rubber	Synthetic hotmelt rubber	Synthetic hotmelt rubber	Synthetic hotmelt rubber

Product Features & Benefits

Features	Benefits
High bond strength & high tack	Easy to apply, with no curing time. Allows strong bonding to epdm strips that form the seal around door/window frames
Good peel & aging resistance	Long term outdoor / weather & aging resistant
Dimensional stability	A scrim prevents stretching of the foam during application (foam returns to original state)
Migrating plasticizer resistance	Long term resistance to plasticizer migration from the epdm
