

AFB™ 6411W

Avery Dennison[™] AFB[™] 6411W is a white acrylic double coated foam tape, with acrylic adhesive for low surface energy substrates on both sides. This firm yet thin foam adhesive is a custom solution for low surface energy (LSE) substrates and features an additional layer of modified acrylic adhesive for good bonding to powder coated paints. The conformable foam density level enables good lamination on irregular substrates, and offers good weather and environmental resistance. Used for construction and mounting, attachments, and bonding of bumper rails and nameplates on low surface energy (LSE) materials.

FEATURES

- · Foam tape with viscoelastic acrylic foam carrier
- Closed cell structure
- Acrylic adhesive system

BENEFITS

- High adhesion combined with good shear absorbs shock and distributes stress evenly
- Good moisture, UV and high temperature resistance
- Uniform bonding performance
- Helps eliminate the need for mechanical fasteners, drilling or grinding and related clean-up for certain applications
- Polyethylene liner helps provide good moisture stability and easier converting with its high tear strength

CONSTRUCTION:

Liner: Polyethylene Coated White Paper Adhesive 1: LSE Acrylic Carrier: White Acrylic Foam Core Adhesive 2: LSE Acrylic

APPLICATION TECHNIQUES

• It is essential, as with all pressure-sensitive tapes, that the surface to which the tape is applied be clean, dry, and free of grease or oil

Bond strength is dependent upon the amount of adhesive-to-surface contact developed

• Note that different pressure, time and temperature on different (film / rigid) surface achieves different performance

STORAGE / SHELF LIFE

• One year when stored at 64-72°F (18-22°C) / 30-70% relative humidity, out of direct sunlight and in original packaging.
